

ENERGY POLICY

In line with our sustainability purpose;

- To fulfill the requirements of the energy-related legislation, to ensure effective energy and resource management.
- To determine a reduction target within the framework of the Energy Management System, to provide the necessary resources to achieve the determined targets,
- To ensure the dissemination of the targets to all processes. To prefer energy efficient products and services in equipment and service purchases,
- To ensure efficient use of natural resources and energy. To make continuous improvement on energy efficiency, to follow the application and data,
- To increase the ratio of renewable energy sources in energy use,
- To improve our Energy Management System (EnMS) continuously. To document, review and update the Energy Management System and announce to all functions,
- To establish effective communication with all our stakeholders in order to create common value and beneficial results on Energy Management related issues.
- Besides training to all our employees on energy in order to raise awareness, contributing to become conscious of our suppliers, subcontractors, visitors and the local community.
